Worth, the Woman's Tailor at Paris. The Paris correspondent of the Boston Guzotta cays:

Worth, the woman's tailor, has returned to town, and commenced his season. Do not wonder if I mention him next after diverces; he has caused more diverces than any other man in Paris; for if your wife' ball-dress is not made and put on by him, she is disgraced, and if he does not make them, you are ruined. Is it his fault that his rates of charging are so high? Maks the days 48 hours long and relieve him of the vulgar wants of steeping and eating, he will abate 50 per cent. of his prices. Seduce his customers into paying cash, and he will make a further reduction. The Empress has swed him \$40,000. The Princess Clathilde, \$10,000. The Princess de Matternich, \$20,000. A dabt of \$1,000 makes no more figure on his books than the one year's subscription of a delinquent patron of your paper does in the Gazetts office. I should not like to say what rent omes. I should not like to say what rent he pays—you would be sure to make an irenical gesture not very complimentary to my regard for truth. The state salogue of the Trileries are not more aplended. Gilding is lavished on them, the door curtains are Beuvale tapestry, the window curtains and furniture are of the finest Lyons brocade, and the furniture is Boule, and each console between the windows being worth \$600. Most vonng men consider it a great their outset in life in a good and comfortable business. This is a mistaken notion. So far from poverty being a misfortune to them, if we may judge from what wa every day beheld, it is really a blessing;

## The Day After Marriage.

The departure of a son from beneath the

paternal roof does not present any specta-cle of desolation. Masouline life has, from infency, an individuality and independence, an egotism, so to say, which is essentially wenting in female existence. When a son abandons his parents to create for himself a separate interest, this separation causes but little interruption in their mutual relations. A men marries, and still retains his friendship, his habits, and his anal affections. Nothing has changed in his life; it is only an additional tie. His departure consequently is a mere separation, while the departure of a young girl to become a wife in a few hours le a real desertion-desertion with all its duties and feelings still fresh about it. In one word, the son is a sapling which has always grown apart from the trunk, while the daughter has, on the contrary, formed an essential portion of it, and to detach her from her place is to mutilate the tree itself.
You have surrounded her youth with unspeakable tenderness—the exhaustless tendernass of your paternal hearts, and she, in retnra, has appeared to pour forth upon you both an equally inexhaustible grati-tude; you loved her beyond all the world, and she seemed to you with a proportion-ats day, a man arrives, invited and welcomed by yourselves, and thie man of your own choice carries off to his domestic eyric your gentle dove, far from the soft nest which your love had made for her and to which hers had olung. On the morrow you look around you, you listen, you wait, you seek for something which you cannot and. The cage is empty; the tuneful lin-net has succeeded to its melodious warbling; it does not come as it did on the pre-vious morning, fintering its perfumed wings about your pillow, and awakening yon by its soft caresses. Nothing remains nt a painful calm, a painful void.

Press of yesterday:

The battle which commenced on Thursday morning was resumed at an early hear yesterday, the attack being made, as on the day previous, by Maj Geo. Thomas.

Before the atreaks of moreing were to be seen, the roor of artillery announced the commencement of the coming bloody strengths. Soldiers who, during the night had alumbered on their arms, were switched by the bustle consequent upon the general preparation, and "amward they march embattled, to the sound of martial harmony; fifes, cornete, druma that rougs the sleepy soul to arms and boid, heroic deeds."

Bhortly after daylight the Federal army moved out, and about 9 o'clock made an attack on the refuel works. Up to a intile before noon to developments of importance occurred. During all the forenoon tremendous artilitery dusis took place, our forens, however, using ten gues to the enemy's one.

On the right of the Federal these the troops ware posted in an open field, and on the center and left the position was more advantageous, although the ribels all day had the best position.

The Fourth and Sixteenth corps did splendid fighting all the afternor. The Fourth corps carried three lines of worse, and in doing so suffered considerably. They earthred a four pan bettery and four huntred prisoners at oan charge.

Seadman's corps, consisting of white and colored troops, carried a strong position at the point of the bayonet, capturing a battery, calseons and borses complete, and three hundred prisoners.

The more interesting this part of the exercise can be made, the better. I then require them to spell ox; first pronouncing it, then epelling, then prenouncing again; and this twice before atopping, giving the proper it a citions. I print ox; x o, x, o, &2., and ask why each is not ox; and so on until the alphabet le learned, by which time the achoises have been introduced to quite a number of words.

B, d, p, q, being the hardest of all the leaters, require particular attention. I have found the following plan most successful:

After de-cribing them, I show that ell have straight lines down, and the difference between them lies in the position of the half of an o. B and p have belt an o or the right head side; d and q on the left hand side. To say b and p, you keep your mouth open. I require the achoises to say "when the part of the o in on the right hand side was much short one. d and q, you keep your mouth open I require
the scholars to say "when the part of the o's
on the right hand side, you must shut your
mouth to say thefletter," and rice versa. I think
that helps them.

When the scholars know all their letters, I

In teaching reading in the First Reader, I require the scholars to spell each word in the line they are to read, beginning at the last word; then to read the line backwards, finally forwards; in the latter case, being particular about the proper infactions. As the scholars advance in the reader, I omit their spelling the words in the line; but shwap require reading backwards as well as forwards. Some contend for what they term a noral education, while others of a more fastidious class desire only the advancement of the intellect, paying little or no attention to the investe. Now on extreme either way is much to be regretted, for truly has it been said that "intellect, so right, so glorious, and so godike, was given insu that he might live virtuously, and disparge his dulies to God and his tellow-creature.

area correctly."

A proper cultivation of the moral and intelectual nature of mankind has ever been the neation of every age of the world, and how beautifully do we find it expressed by Thomp-ou in his sublime style: "O, Education, withbesutifully do we fied it expressed by Thompson in his sublime style: "O. Education, without thee, what were enlighteeed man! A savage rouming o'er the forcet in quest of prey, with unlashioned fur, devoid of every finer art, and elegance of life; nor happiness, mixed with tenderness and care; nor moral excellence, nor social biles; nor guardian is were bie; but taught of thee, ours are the plans of policy and peace, to live like brothers, and, or jouctive all, embellish life." As I remarked before, an extreme either way, in regard to man's moral and intolocutal training, is much to be regretted; for the head and the beart are both cessential to man's nobler belog. In quitavating one, we should not neglect the other; for, as Harrison has said: "To catinate one and negled the other, is to deviate from the path to clearly incleated by nature and nature of the infinite importance of a thorough deducation, both inclinations in the content of the infinite internation and the content of the content of the infinite internation and market beit child rea become acquarked with a faw of the elementary braftches of an Ergitch education, regardit g swything beyond a limited knowledge of reading, writing and apelling, a waste of time and means. On the lid of the coffin there was a full length figure of a Bishop in his robes. It was inspected by some antiquarians, including Dr. Todd, who expressed it as his belief that it was the original founder of the church, St. Patrick. It is in good preservation, and it is in every respect a most interesting relic. When the burch is finished it will be placed in a most prominent position, because there is no mor

Robin Adair, the haro of the song, was well known in the London fashionable circles of the last century by the sobriquet of the "Fortunate Irishman;" but his parent-age and the exact place of his birth are uumown. Ila was brought ap as a surgeon but "his detection ln an early amour drove him precipitately from Dablin," to push his fertanes in England. Scaroely had

fame and fortune commenced.

Near Helyhead, perceiving a carriage overturned, he tendered assistance. The sole occupant of this vehicle was a "lady of fashion, well known in polite oiroles, who received Adair's attentions with thanks; and, being slightly hurt, and hearing that he was a surgeon, requested him to travel with har in her carriage to London. On with har in her carriage to London. On their arrival in the metropolis she presented him with a fee of 100 guineas, and gave that will produce sixty or seventy bushels of corn to tha acre will produce a good crop of onlons if properly outlivated.

When lady Carolina was taken by her friends from London to Bath, that she might be separated from her lover, whe wrote, it is said, the song of "Robin Adair," and set it to a plaintive lrish song that she had heard him sing. Whether written by Lady Caroline or not, the cong is simply expressive of her feelings at the time, and as it completely corroborates the circumstances just related, which were the town talk of the poriod, though now little more as it completely corroborates the circum-stances just related, which were the town talk of the period, though now little more than family tradition, there can be no doubt that they were the origin of the song, the words of which, as originally written, are the following:
